Diablo Sub Panel

The Diablo Sub Panel is the perfect complement for all the speakers in the Artcoustic range. It is extremely versatile and can hang on the wall or stand on the floor. It employs twin 10" X2 long-throw woofers and the X2 bass system to precisely control airflow and pressure inside the cabinet, achieving a bass response down to 20Hz. All of this in a compact, slimline design. The Diablo Sub Panel is ideal for use in high-end installations, where sound quality is paramount, such as small sized home cinema installations and for commercial use in bars, restaurants and corporate presentation facilities.

The Diablo Sub Panel comes with a PA-1800: a 3 channel amplifier with a total of 1800 watt.
