ONE SPEAKER, ENDLESS OPTIONS

The Modular speaker system features 2 models, but Artcoustic's typically innovative design brings endless options to this range. The Modular One is the smallest speaker Artcoustic has ever produced and at just H250mm x W78mm x D54mm it is perfectly suited to ever thinner on wall LED and LCD screens.

The standard Match system screens are available, but for more interesting design elements, the stand alone Modular Satellite can be upgraded with oversized baffles and printed designs to ensure they suit any system and any interior design. Just choose the size and design, and your Modular cinema system is perfect for your living space. Performance is assured with very high end 3.5" full range drive units.

The Modular One is designed for on-wall and in-wall applications.

Modular One

1 way Multi purpose loudspeaker. 2 x 3.5 inch full range unit. All screen options are available for the Diablo Monitor: The Match System and Digital Prints when supplied with optional baffles.
